### Product Description

Nippon Matex Gold has been formulated to enhance the beauty of interior walls with good washability. Nippon Matex Gold offers the freedom to choose from a broad spectrum of colours for every mood.

**Clean Up :** Clean up your equipment with water immediately after use.

## Surface Preparation

Bare masonry surfaces should be completely dry and free from dust, dirt and grease. Use Bleach solution to treat the surface affected by fungus. Apply NIPPON VINILEX 5100 WALL SEALER and allow it to dry completely. Avoid painting when the moisture content and alkalinity of the walls are high. (Recommended painting specification requires the moisture content of the walls to be below 16% measured by protimeter and alkalinity of the walls to be below pH9.)

## Previously Painted Surfaces

**Sound Surface:** Make your surface sound by removing unstable paint film, and loose chalk by rubbing down using abrasive paper or wire brush and dusting off.

**Severely Defected Surface:** Repair large cracks and holes in your walls with sand and cement mixture and allow them to dry thoroughly. Scuff to make your walls smooth and dust off thoroughly.

## Recommended Paint System

**Type of Substrate:**  
FOR MASONRY
