NIPPON TEXTURE NIPPON'EON

Surface Preparation

All the surfaces must be thoroughly dry before texture application. Remove dust, grease, oil, and other foreign matter from the new masonry surface. Use a bleach solution to treat the surface affected by fungus or algae. The surface should be smoothened with abrasive paper or sandstone. Dust off for the proper application of Nippon Texture Nipponeon. Allow all surfaces to dry completely before painting. Avoid painting when the moisture content and alkalinity of the walls are still high.

Previously Painted Surfaces

Remove all unstable paint film, loose chalk, dust, and foreign matter using suitable sanding paper or a stiff brush. Dust off properly. Apply Nippon Vinilex 5100 Wall Sealer and allow thorough drying.

Product Description

Nippon Texture Nippon'eon is a unique water-based texture which gives tremendous texture motifs with special texture rollers and scrapers. Different beautiful patterns can be created as a base and can be top-coated with various shades of water and solvent-based products.

- Green Product
- Long Lasting & Durable
- Low Absorbency

Direction for use

Spread Nippon Texture Nipponeon with brush or scrapper without thinning (or if very fine structure is desired it can be thinned up to 5% with water) and then with the help of special rollers create various patterns. Do not use damp rollers as this will make the structure smooth. Move your roller in both horizontal and vertical directions for uniform texture if sponge roller is used. Move your roller only in one direction if rubber motif roller is used.

Safety, Health and Environmental Information

Keep out of reach of children and away from food and drinks. Harmful if swallowed. If swallowed, seek medical advice immediately. Ensure good ventilation during application and drying. Do not breathe in vapor or sanding dust. Avoid contact with eyes and skin. When applying texture it is advisable to wear eye protection. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Wear protective clothing and mask during application. Use soap and water to clean the splashes from skin. Texture must always be stored in a cool and dry place. Care must be taken during transportation. Always keep container in a secure upright position. Use sand to contain any spillage. Dispose off Texture in accordance with the appropriate Environmental Quality Regulations. Do not discharge into drains or environment. Chemical Safety Data Sheet available on request.
